

New Construction Builder Service Application Instructions
(effective June 12, 2023)

1. NOTE: This Application is only to be used for situations where a new residential or commercial construction builder or contractor is needing water and/or sewer service during construction. The construction builder or contractor will need to fill out and submit the attached New Construction Builder Service Application to the Galveston County Water Control and Improvement District No. 1 (District) Falco Office located at 2320 Falco Street, Dickinson, Texas 77539 or by email to falco@gcwcid1tx.gov. If there are any questions concerning this form, please call 281-337-7529.

2. In addition to this application, the construction builder or contractor will also need to provide the District the following information in order to process this utility service request.
 - **Proof of Property Ownership** – A warranty deed, final closing settlement statement or other document that confirms property ownership. In the event the construction builder or contractor requesting service is not the property owner, they must provide written documentation from the property owner that they are in agreement with the proposed utility service request. The construction builder or contractor would then be responsible for all required fees and installation costs.

 - **Property Survey** – For new builds or re-plats, a copy of the recorded plat / re-plat or boundary survey of the property.

 - **Construction Plans** – For new builds or addition of structures on the property, a copy of the proposed site plan showing the proposed water and sanitary sewer layout.

 - **Address Verification** – Verification of the property address by the City of Dickinson or Galveston Central Appraisal District. A 911 address designation will only be accepted for additional structures on a property in unincorporated Galveston County.

- CITY OF DICKINSON - Permits Department - 281-337-6276**
- GALVESTON CENTRAL APPRAISAL DISTRICT – 409-935-1980 or toll free 1-866-277-4725**

3. All property “not in the District” and desiring service from The District **must be** annexed. Only Property Owners may annex a property. The District will not proceed with water and sewer services to the property until after annexation.

4. Upon receipt of all requested information, the District will process this application within five (5) business days and provide the construction builder or contractor via email with the required tap fees, line extension construction costs (if necessary) and customer deposit amount per each property where utility services are being requested. **The quote for fees on residential water and sewer services are valid for 30 days with the exception of the following which are only valid for 15 days: water taps over 2”, sewer taps over 4”, force main taps & line extensions/upgrades.**

5. Construction Builders or Contractors desiring to proceed with the water and sewer taps will make payment in full at the District's Administrative Office located at 2750 FM 517 Rd East, Dickinson, Texas 77539. In addition, they will be required to complete the "New Construction Builder Account Application" while at the Administrative Office. **The District shall have 30-45 business days from date of payment to make service taps which is dependent on weather or circumstances beyond the District's control.**
6. The District will determine the location of the water and sewer tap. In special situations, The District may need to set a meter and/or sewer clean-out on the customer's property due to lack of available space within the right-of-way.
7. **The District is the only authorized entity allowed to perform the water and sewer taps and install the water meter. Any tampering or illegal connections to the District's facilities will be subject to a \$500 fine per occurrence. Service will not be made active until all such fines are paid in full to the District.**
8. In order for the construction builder or contractor to receive water service during construction and remain in compliance with the District's mandatory cross-connection control program, they must install a hose bib with a vacuum breaker and shutoff valve on a 24" tall riser pipe directly after the meter. **Water service shall not commence until this assembly has been inspected and approved by the District.** Any water or sewer used during construction by the builder or contractor will be billed to the account owner.
9. All construction builders or contractors shall obtain a plumbing permit through the City of Dickinson's Permit Department (281-337-6274) for their private side service lines. Customers are required to use a licensed plumber to install these service lines and the plumber will be responsible for making connections to the District's water meter and sewer service line. If a hose bib with a vacuum breaker was used during construction, this assembly must be disconnected prior to the plumber's private side service line connections. **The District will not allow the residential or commercial property to become occupied until the District has received a passing Customer Service Inspection (CSI) Certificate from the City of Dickinson.**
10. All District taxes must be paid in full on property in question before any services will be connected.
